

Internships Expressions of Interest

About entX

entX is focused on the development and deployment of innovative green-energy technologies that use waste or unconventional resources to generate value.

Our technologies are creating step changes in power provisions to industries including manufacturing, defence, space and the internet of things (IoT). Innovations captured within our clean energy projects further help to decarbonise heavy industry, contributing to global net-zero emission targets by 2050.

Opportunities

entX is seeking expressions of interest from science and engineering students to undertake internship projects throughout 2023. Opportunities will be available on an ad-hoc basis for undergraduate mechanical engineers, mechatronic engineers, chemical engineers or science undergraduates.

Applying

Send your expression of interest in the form of an application letter which will include a short summary of yourself and your achievements, as well as the projects you would have completed thus far as part of your degree to info@entx.com.au

entX seeks to be an employer of choice, a place where people want to work because it is meaningful, offers purpose, and where an individual contribution is acknowledged as part of a team effort. We value our people and recognise the importance of diversity in the workplace. A multitude of perspectives and diversity of thought has a direct and positive impact on productivity and creativity, which in turn can drive employee engagement and enablement allowing staff to reach their full potential.
